

## Welcome to The American States Assemblies

### Your Government

Your Government is supposed to be staffed by you.

It's decisions are supposed to be made by you.

It's primary responsibility is to protect you and your property assets at all costs and against all comers.

That's why governments exist.

And that is the only reason for any government to exist, ever.

But what if your government doesn't protect you?

What if, instead, your government preys upon you, threatens you, harasses you, and makes you miserable and fearful?

Then something is terribly wrong.

Six generations of Americans have been preyed upon, threatened, and harassed by something posing as "their" government.

It isn't our government.

It's a substitute government run by two Federal subcontractors.

Those foreign governments are under contract to provide us with certain enumerated "governmental services".

They are supposed to operate under the limitations and in accordance with their employment contracts called the Constitutions.

Instead, they've been colluding to evade their obligations under the Constitutions.

And they've been misdirecting our Employees to racketeer against us and to misidentify our political status, to impersonate us, and to defraud us.

They've done exactly the opposite of what your government is supposed to do.

But do you notice something? Do you see what's missing?

You are.

You are supposed to be self-governing. You are supposed to be running Your Government.

Not your Hirelings.

So, we noticed what was wrong a long time ago. And we dusted off our laurels and we got to work.

If you want a government that protects you, a government that doesn't steal from you, harass you, threaten you, or harm you — then, it's high time that you start backing Your Government and participating in it and supporting it with your money and your skills and your time.

When you come home to the land and soil that bore you, and start breathing as a free woman or man again, you will remember the American Dream and you will no longer bear the burdens of Federal (US) citizenship.

You won't be subject to foreign statutory laws.

You won't worry about "Federal Agents" breaking down your doors.

You won't pay "Federal Income Taxes" anymore.

You will have little or no reason to ever visit their courts.

You will possess your homes and your land and soil as Freeholders — not Tenants.

You won't pay any mortgages or utilities or property taxes.

You will be in control your own lives again.

You will sleep sound in your beds again.

What greater profit can you realize by investing in anything else?

### **What Are The States and Why Do We Need to Assemble Them?**

Both the living people (soil) and the Lawful Persons (land) are the same, just acting in two different capacities in the same way that you can act as a Father or as a School Teacher.

The States operated by the Lawful Persons --- the People --- are the Parties to the Constitutions, and as a result, these are the States and People that can enforce the provisions of the Constitutions.

Nobody else on our side of the issues can enforce the Constitutions.

And we haven't assembled the States in 150 years. Until 2020.

We haven't been acting in our correct capacity, we haven't been assembling our States and conducting business, so they have simply ignored us and "presumed" that we are either British Territorial Citizens or Municipal United States Citizens temporarily "residing" here as "US Citizens" in the same way that they are.

It is therefore necessary and indeed, it has become urgent, that we wake up and correct the falsified records misidentifying us as "US Citizens", and adopt our proper political status and act in our capacity as Lawful Persons ---- the People --- and assemble our States of the Union.

This has not been done since 1860. We have never seen our actual government in action.

As a result of this unconscionable contract --- a purported contract that we ever knew anything about ---- to act as "US Citizens", and therefore not as Americans known as Texans, Californians, and so on ---- we have been precluded from acting as Lawful Persons and prevented from claiming and exercising our birthrights and of course, could not act as We, the People, either.

Until now.

It is to be hoped in the present circumstance that a majority of those reading this will step forward and serve their State, which is being assembled for the first time in a 150 years and is in great need of their service.

We need to "repopulate" our States of the Union, which requires filling our Jury Pools, filling our vacant Public Offices, holding elections, and doing all the other work of our lawful State Governments.

### **Become an American State National**

What we are doing by reclaiming our birthright political status as American State Nationals and American State Citizens and by expatriating from all presumed Territorial and Municipal citizenship(s) is to lawfully convert Legal Persons back into Lawful Persons.

We are explicitly declaring our political status and officially returning our Good Names, our Trade Names, to the Soil/Land jurisdiction of our actual States of the Union.

Once you have started the process to correct your political status, find out who your state coordinator is to join your State Assembly. By serving our States of the Union as State Assembly members we breathe life back into our government "of the people, by the people, and for the people"--which is by definition not a government "of the persons, by the persons and for the persons" subject to the Queen and the Pope.

### **Join Your State Assembly**

Your Mission as members of your State Assemblies proper, is to reclaim your stolen identity as American State Nationals and American State Citizens and to Assemble your State and finish the Reconstruction.

The health and strength of the State Assemblies is a direct measure of the health and strength of our country as a whole. There can be no greater duty set before any American than the duty to "come home" to the land and soil jurisdiction and join their State Assembly.

### **Our Mission: Reconstruction**

Strange as it may seem to us today, the Reconstruction required as a result of the Civil War has never been finished. In truth, it was never properly started.

No adequate Notice and Disclosure of the circumstance was ever given to the general populace of America. And there are obvious, self-interested reasons for that.

The last Congress of the Federal States of States adjourned for lack of quorum when the Southern States of States walked out.

## **The Plan for Reconstruction**

### **Step 1: Your State**

We need to get the State Assemblies up and running and fully "populated" with people who have corrected their political status -- actual State Nationals and State Citizens.

Your Mission as members of your State Assemblies proper, is to reclaim your stolen identity as American State Nationals and American State Citizens and to Assemble your State and finish the Reconstruction.

### **Step 2: Re-charter the Federal States of States**

We need to re-charter the Federal States of States and put an end to "Reconstruction".

Only our State Assemblies have the power to re-charter our Federal States of States and retrieve their assets-- that is, all the State land trusts doing business under names like: the Wisconsin State, Ohio State, et alia., from the Territorial Caretakers.

### **Step 3: Hold a Continental Congress**

Hold the Continental Congress and take care of all the business that needs to be brought forward to current time.

We the People, will act in our actual capacity as State Nationals and State Citizens, and do the work of Reconstruction---- create our own American Subcontractors to do the principle share of work as assigned under the actual Federal Constitution.

That will put an immediate end to a lot of monkey business and leave nobody any cause to complain about our action to take back control of our country and its assets and its service contracts.

Also, acting as the People, as members of our State Assembly, we can address the multitude of international crimes which have been practiced against us.

By: Anna von Reitz©

**What's YOUR first Step?? Correct Your Status and Re-Educate Yourself!**
